Inauguration of the Exhibition #AÚltimaGota_Algarve

On June 24, the **exhibition #AÚltimaGota_Algarve** opened in Alcoutim.

This exhibition aims to provide a unique, immersive and interactive experience, with information on water consumption in the world, in Portugal, in the Algarve and in areas as different as the domestic sector, agriculture, golf courses and tourism. The main objective is to alert to the most correct use of water, leading participants to reflect and adopt behavioral changes.

The exhibition is the last material produced for the project **#AÚltimaGota_Algarve**, supported by the Environmental Fund and included in the "ENEA 2020 - Sustainable Production and Consumption" program. See all the materials resulting from this project [here](#). 🐦

Until the 22nd of July, visit the exhibition #AÚltimaGota_Algarve, at Escola Básica Integrada de Alcoutim, from Monday to Friday, from 9:00 am to 3:30 pm. Entry is free!

MEDwater Project

On the 30th of June, the webinar **“Portrait of Water Scarcity in Alentejo and Algarve”** took place. It served as a starting point for the **MEDwater** project, which will be led by Associação ZERO in partnership with ALMARGEM.

The two associations intend to play an active role in monitoring public water policies related to the management of water resources and the management of investments in irrigation in the Alentejo and Algarve regions.

To learn more about this project, watch the webinar [here](#). 🐦

Volunteers needed!

This summer Almargem will be present at some events, but we count on your help!

📍 **Feira da Serra**

📅 São Bras de Alportel
28th to 31st of July

📍 **Mediterranean Diet Fair**

📅 Tavira
8th to 11th of September

If you have a few hours available on these dates to support us on the Almargem stands, contact us!

Your help is essential!
